For over 30 years AAA Energy Service Co. has been a full service design-build-maintain HVACR

“Our energy audits provide building owners with an updated road map of their asset Infrastructure, their energy usage and their costs,” said Barden. “ Audits let our customers know where they are today and what they can do to save money and still offer a comfortable and efficient work environment.”

AAA Energy Service Co. is a substantial HVACR company, well managed and financially strong. With that comes depth, diversity of talent and resources second to none. Sometimes it takes a lot of ‘horsepower’ to get a job done. When that is the case, we’ve got it!”

“Preventive maintenance activities are carefully planned, directed and monitored,” said Barden. “Additionally, we can offer customers the opportunity to update their plans as often as required.”

Nearly 30 years ago, James Barden was the young engineer in Boston, founded Acme Engineering Co. in 1948. James built a company that the firm boasts was “able to meet environmental standards” and “a single point replacement.”

“Preventive maintenance programs have been an integral part of building owners and property managers’ concerns about rising costs of mechanical system ownership. The team works closely with the customer to create a tailored plan for each mechanical system configuration. Computer scheduling allows the team to minimize costly mechanical system downtime,” said Barden. “We can protect our customers’ investments in their facilities, while maintaining safety.”

“In 1983, Acme became the AAA Energy Service Co. Jay’s brother were at the helm. CEO Peter Kelley and DAVID BARDEN, President of Operations, leads the company.”

Barden. “Our energy audits provide building owners with an updated road map of their asset Infrastructure, their energy usage and their costs,” said Barden. “ Audits let our customers know where they are today and what they can do to save money and still offer a comfortable and efficient work environment.”

Regular maintenance at Muffler King Auto may avoid costly repairs and road dangers

“Why have to buy new tires than they need to,” he said. “Tires don’t wear out sooner can pay for itself over the life of the vehicle. When tire alignment is out of parallel to each other, they can slow proper engine performance, rain a quiet ride and endanger occupant safety. Proper tire pressures can provide a smooth ride even when the car is carrying cargo. A healthy car is one that drives smoothly and safely. The wheel alignment is very important in making sure your tires don’t wear out sooner than they need to,” he said. “That’s just plain good for you and the vehicle. Brake inspection is one of the most important inspections on a vehicle. The driver should check their brakes every six months. King offered some basic instructions.

The popular Hathorn Park opened in 1983. Granite inscriptions of World War I veterans are recorded in 1904 and named to the Nation-
Newport shines as both a business center and a place to just enjoy Maine life

BY VALERIE TUCKER

Correspondent

Located midway between Bangor and Waterville, New-
port is known as the Cross-
roads of Maine. This friendly
community in the heart of
the Sebasticook Valley region
enjoys access convenient to
shopping, schools, employ-
ment, internation air travel,
major road access and rela-
tive ease of living. The large
village is the hub for the
region and is home to an
derived manufacturing
and engineering degree pro-
grams that draw student from
around the world. Historically, Newport's
community roots began in 1780,
when hydraulic damming and
manual labor began a mill river
and manufacting sector. In 1780,
John Ireland, along with his
wife, son and brother, arrived
on Birch Point. In 1804, Deacon
Samuel Weston surveyed 23,000
acres of East Pond Plantation.

The Egg Festival is a week-long event that brings together the community and celebrates the history and culture of egg farming in Central Maine. It is a time when people gather to enjoy music, food, and fun activities, while also supporting local non-profit organizations.

The Egg Festival features a variety of events, including music performances, kids activities, and a parade. The festival also includes a craft show, where local artists showcase their work. The Egg Festival is a wonderful opportunity to experience the local culture and support the community.

For more information on the Egg Festival and its events, please visit the website at www.bergactivewear.com. You can also follow them on social media for updates and special offers.
